1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 13-15 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, teaches a postable sticker in a multi layer stack or pad as shown in figure -2 (see specification, page 5, lines 23-24). However, the specification fails to teach that "said temporary posting pressure sensitive adhesive - coated postable sticker being directly stacked --- said plurality of identical stickers" and this phrase is considered to be new matter. Further, phrases such as "directly stacked", and "perfect perimeter registration" are also found to be unsupported by the specification. Additionally, the negative phrase "without having any ... identical stickers" is not expressly supported and is considered to be new matters.

3. The amendment filed The amendment to the specification; page -3, line 4, "immediately"; page - 3, line, "identical" and", in perfect ... one another"; page -3, line 6, "without any --- Figure (2) and"; page - 3, line 9, "As shows --- first area" ; page - 6, line 8, "As shown --- second area 9" are all found to be new matter for lack of support in the specification is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no

amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

Applicant is required to cancel the new matter in the reply to this Office action.

Claims 13 and 15 are rejected under 35 USC 102<sup>b</sup>(6) as being anticipated by Haugwitz for reasons of second in paper nos. - 3, 5 and 8, paragraphs - 3, 1 and 2, mailed on September 8, 1999, March 6, 2000 and April 26, 2000, respectively.

Claims 13-15 are rejected under 35 USC 102(b) as being anticipated by Madole for reasons of record in paper no. 8, paragraph - 7.

4. Applicant's arguments filed July 22, 2000 have been fully considered but they are not persuasive. Applicant argued that Haugwitz fails to teach the absence of any protecting means between the stickers. This is not deemed to be convincing because the amended claims contains new matter phrases such as "said temporary posting --- without any protecting means --- identical stickers" which is required to be canceled.

Applicant also argues that Madole fails to teach that the adhesive coated area is located "immediately adjacent" to the top edge and that Madole fails to disclose removal of the adhesive free "registering margin". These are not deemed to be persuasive because Madole's adhesive area is indeed located "immediately adjacent" the top edge in the absence of any showing by the applicant as to what is referred to by said phrase "immediately adjacent. In fact, Madole's adhesive area meets the "adjacent" requirement and also "immediately adjacent" location.
